

Aires is a proud sponsor of the Rocky Mountain Relocation Council and its charitable organizations. As a long-time supporter we are committed to the success of the organization and have been a proud sponsor for several years.

About Aires

Aires is a full service relocation management company with a 36-year track record of creating relocation and assignment management solutions. With 450 employees, Aires is headquartered in Pittsburgh, PA, with multiple regional offices throughout the United States (Americas), EMEA, and APAC.

We consider our key differentiators in the marketplace to be our **People, Process, and Technology**:

People: Our people are responsive to our clients' needs and create a highly personalized customer experience. They are leaders in the industry inspired by a caring attitude and a drive to serve others. It's who they are and an integral part of their personal character – we call it the "Aires DNA."

Process: We think global mobility should be seamless. That takes a refined, streamlined strategy. From beginning to end, our customizable processes help our customers navigate through potential challenges. Each process is ISO certified and metric-driven to ensure that our service team and our service partners are performing at their highest levels.

Technology: Aires' RELOxSM is a secure, integrated technology suite that offers greater transparency, efficiency, and control for the entire mobility process. Based on the concept of the "user experience" (or "UX"), our tools have been designed from the ground up to be user friendly, combining ease of use with maximum functionality. Aires RELOxSM supports the entire relocation and assignment lifecycles and reduces our clients' administrative burden, enabling them to be more strategic in the management of their program.

We would value the opportunity to learn more about your mobility program and share a copy of our complimentary policy benchmarking survey sponsored by Aires Consulting Services.
